

# Heart Animals

## What you will need:

Construction Paper  
Googly eyes  
Scissors  
Glue stick  
Markers  
Ribbon or string

## How to do it:

- Cut out several hearts about 2 ½ inches by 2 ½ inches.
- To make an elephant, use two hearts. Also cut out part of a heart and then extend it directly from the bottom of the heart to make a curved trunk. Glue the tips of the two heart-shaped ears to the back of the head. Add googly eyes, mouth and your message.
- To make a mouse, use two hearts. One for the body and one for the head. Glue the hearts together as shown. Add semicircles to the upper corners of the head to make the ears. Fold the ears so they stand upright. Add googly eyes and a mouth. Cut a hole to add a ribbon or string tail. Add a message.
- To make a fish, use two hearts and a smaller heart. The two larger will be the fish's body and the smaller one for the tail. Glue the hearts together as shown. Add googly eyes and a mouth. Add your message on the back.
- Kids can also use markers, glitter or stickers to decorate the animals.
